

**MODEL: CAP4660-3**  
**Automatic Multi-Head Chuck**  
**Capper System**  
**Cap Sorter/Cap Chute**  
**3-10 Head Rotary Chuck**

Our conveyor mounted Automatic Chuck Capper's heavy-duty construction allows for high speed and high torque applications. The Tightening is accomplished by magnetic clutch torque technology.

This base model will handle caps from 8mm to 110mm, and containers from 1 to 14 inches tall. Cap specific 304 stainless steel chucks are constructed for each client's cap range supplied.

Industrial-Duty stainless steel sheet and plate construction provides excellent durability in almost any packaging environment.

**Features:**

- Tool-less adjustment
- (1) One set of cap/bottle change-parts, Starwheel and guides.
- Engraved torqued reference on cap chucks for ease of setup.
- Cap Sorter Device- Centrifugal with level control.

**Specifications:**
