

**MODEL: MODEL: CAP2600-3
3-Station Cap Tightener**

U.S. PACKAGING EQUIPMENT, LLC

Our 2 or 3-Station Capper Tightener is designed and manufactured to provide the most flexibility in capping. The operator need only place caps onto the bottle and the tightener completes the tight torquing. This base model will handle caps from 8mm to 110mm, and containers from 1 to 14 inches tall.

Tightener with upgradeable design for fully automatic operation; adding a cap specific Cap-Sorter when needed.

Industrial-Duty stainless steel Tig-welded frame and anodized aluminum plate construction provides excellent durability in almost any packaging environment.

Features:

- Tool-less adjustments
- Allen Bradley PLC
- Made in the USA

Specifications:

Industrial Duty 304ss frame
Model 2600: 46"x 36"x 70"

Power: 110 or 220 Vac
Air: added sorter requires air

U.S. Packaging Equipment – Capper Tightener
