

MODEL: MODEL: CAP40-1
Semi-Automatic Chuck Cap
Tightener

U.S. PACKAGING EQUIPMENT, LLC

Our benchtop style Chuck Capper is easy to setup and operate. The operator need only place caps onto the bottle, place under chuck, and depress foot-switch. Tightening is accomplished by mechanical clutch torquing. This base model will handle caps from 8mm to 110mm, and containers from 1 to 14 inches tall.

Tightener with upgradeable design for fully automatic operation tightening for use with conveyor.

Industrial-Duty stainless steel bottom plate and anodized aluminum plate construction provides excellent durability in almost any packaging environment.
